DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This building is a double house in the Greek Revival Style located at 15-17 Prospect Square, Cumberland, Maryland.

The building basically consists of a two and one half story, six bay wide, rectangular structure. Wall construction is brick, laid in american common bond using five to one variation on eastern and western facades while the southern (front) facade features stretcher bond. Wall features include four brick belt courses and repointing on the southern facade. Windows feature the use of both pegs and nails in their construction. The building is supported by a high, stone foundation of rockfaced random ashlar bond with raised joints on eastern facade, smoothfaced coursed ashlar on southern and uncoursed rubble on western and northern facades. Water table is plain (stone). The roof is gable flank covered with asphalt shingles on #15 and ribbed tin on #17. Eaves of the roof feature a boxed cornice with returns, (sheathed in tin) soffit, frieze and dentils on southern facade only. Gabled parapets with tin capping are featured on the eastern and western facades. (Partially rebuilt on east). There are five brick chimneys, both original and replaced, with corbeled capping. Four are located flush end, one is interior.

The two identical main entrances to the houses (doors are different) are located on the southern facade. Each has a triangular pediment with box cornice, soffit, dentils, and bed moulding, supported by two wooden fluted pilasters with scrolled console brackets decorated with acanthus leaves. Each has a transom of one light (#15 has plain glass, #17 has beveled glass). Vestibules have identical ornate wooden frontispiece entrances. (Except for doors). For further descriptions of these please consult field sheets under "Entrances." Outside double doors on #15 are of vertical boards with two recessed architrave trim panels each. Outside double doors of #17 are of vertical boards with one louvered panel and one recessed architrave trim panel each. Entrances have cement platform porches and steps with wrought iron railing. A one run stone stairway with winder leads to basement entrance under front porch of #15. This entrance is recessed with a vertical boards door of four architrave trim recessed panels and three lights. Recessed panels are located on the jambs. #15 has two double hung, six-over-six light basement windows with stone slipsills and recessed architrave trim paneled shutters located in a well. (Decorative wrought iron railing around well). Southern facade #17 has three iron grates in well of basement that cover window wells of subbasement. (Unobservable from outside). #17 has two double hung, six-over-six light basement windows with stone lugsills and shutter hinges. Another double hung, six-over-six light basement window with wooden slats panel below a wooden slipsill was originally a door. All the windows are in a well with decorative wrought iron railing. Both #15 and #17 have identical first floor windows. Each have two double hung, six-over-nine light windows, cornices with dentils and tin flashing. Also featured here are decorative wrought iron balconies and interior wooden shutters. (Shutters have louvered and recessed architrave trim panels). Second and second and a half floors are identical too, except for movable louvered shutters on #15 windows.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

Richard Dorsey Johnson arrived in Cumberland in 1839 at the age of twenty intending to enter into a business. He joined a partnership operating a drug store and later established a lumber business. After much success in lumber Mr. Johnson founded a flour mill that was one of the city's larger businesses during the latter half of the nineteenth century. Thomas and Williams saw a parallel between Mr. Johnson's career and the history of the C&O Canal, the two were "contemporaneous." ¹ When the canal was damaged by floods in 1889 Mr. Johnson was appointed as a receiver to care for the business of the temporarily defunct waterway. At one time he was appointed a trustee for the canal and was directed to sell it at a public sale, but that order was later rescinded. ²

During the Civil War R.D. Johnson was a vice president of the Union Men, a pro-Northern organization in this area that was divided emotionally between the North and the South. ³

Mr. Johnson's ancestry can be traced to Thomas Johnson, the Revolutionary War governor of Maryland, who nominated George Washington to be commander-in-chief of the American Army. George Washington later credited Governor Johnson for saving the Revolution by recruiting 4000 Marylanders for the army that then consisted of only 500 Virginians. ⁴ 15 Prospect Square remained in the Johnson family from 1847 to 1914. ⁵

In 1866, R.D. Johnson sold #17 Prospect Square to James M. Schley, a lawyer educated at Princeton. ⁶ He had represented Frederick County in the state legislature in 1841 and in 1845 he was elected to represent Allegany County. "He was appointed State's Attorney General in 1850" and later "in 1855 he was elected to that position and served for a period of nine and one-half years." In 1880 Schley lost a bid for a seat in Congress. He was president of both the Third National Bank of Cumberland and the Pennsylvania Railroad in Maryland. ⁷

Lloyd Lowndes Jr. son of the only governor of Maryland to come from Allegany County, purchased #17 in 1899. ⁸ The younger Mr. Lowndes was, like his father, a lawyer and was admitted to the Cumberland bar in 1897. ⁹ At his father's death in 1905 Lloyd inherited his father's one-half of the stock of the Daily News. ¹⁰

The Survey and Inventory are being prepared for information and record purposes only and do not constitute any infringement of individual property rights.

RETURN TO: Maryland Historical Trust
The Shaw House, 21 State Circle
Annapolis, Maryland 21401
(301) 267-1438

There are no windows on eastern facade #17. Subbasement of eastern facade #15 features one recessed four light hopper window with wooden lintel and wooden slipsill. Basement features three double hung, six-over-six light windows with wooden slipsills. Two have flat brick arches, shutter hinges on the one without. First floor has two double hung, six-over-six light windows with plain wooden trim and wooden slipsills. Another window is now bricked up. Second floor has three double hung, six-over-six light windows with wooden lugsills, flat brick arches and shutter hinges. On the second and a half floor are two double hung, four-over-four light windows with mullion and shutter hinges. Also featured is a large wooden lintel and a continuous wooden slipsill with tin sheathing.

There are no windows on western facade #15. Western facade #17 has two double hung, four-over-four light basement windows with wooden slipsills, flat brick arches and shutter hinges. No windows on first floor. Second floor has one casement window (replaced) of four lights each side that swings in with wooden slipsill and shutter hinges. Second and a half floor windows are identical to the same floor windows on eastern facade except for no tin sheathing.

The whole northern facade of this double house now consists of additions. #15 has a two and one-half story shed roof addition with aluminum siding. #17 has a two story shed roof addition with compound board siding. More detailed descriptions of both are found on the field sheets.

From 1913 to 1936 #17 was the home of the Fort Cumberland Club. 11

This double building is one of several Greek Revival buildings within a few blocks of the "town square". Both this building and number 27-29 Prospect Square, being on either side and behind the Greek Temple styled Allegany County Library, help clarify and accent the Greek architectural flavor of this particular block. The southern facade of both houses are identical in design except for shutters on number 15 that are not on number 17. The first floor windows are almost floor to ceiling and have decorative wrought iron railings. Although both buildings have large frame additions in the rear, the main facades of both have not been altered and retain most of their original appearance. They serve as a physical reminder of the cultural awareness of the earlier residents of Cumberland and of the quality of urban life of the last century.

#15 PROSPECT SQUARE

Northern Facade -

(Addition)

- Subbasement - One entrance, recessed in well, two lights, two architrave trim recessed panels, vertical boards.
- Basement - One light casement, recessed, plain architrave trim, swings in. One entrance, four lights, two architrave trim recessed panels, vertical boards, plain architrave trim.
- First Floor - Three, twelve lights each, fixed, recessed two mullions, continuous wooden slipsill. One, six lights, fixed, wooden slipsill. One entrance, nine lights, two architrave trim recessed panels, fluted trim, cornice, architrave trim vertical boards. One, six lights, fixed, architrave trim. One entrance, nine lights, two architrave trim recessed panels, vertical boards.
- Second Floor - One casement, eight lights, swings out, architrave trim. Three casement, one light each, two mullion, swings out, architrave trim.
- Second and a Half Floor - One casement, one light, swings out, architrave trim. One casement, eight lights, swings out, recessed, shutters on balcony.

Eastern Facade -

- Subbasement - One recessed four light hopper, wooden lintel, wooden slipsill.
- Basement - Three double hung, 6/6 light, two wooden sash, wooden slipsills, flat brick arches on two, shutter hinges on one without arch. On addition - one louvered ventilator.
- First Floor - Two double hung, 6/6 light, two wooden sash, plain wooden trim, wooden slipsills. One window bricked up. On addition - four casement, twelve lights each, recessed, swings in, three mullion, brick slipsill enclosed in siding.
- Second Floor - Three double hung, 6/6 light, two wooden sash, shutter hinges, wooden lugsills, flat brick arches. On addition - one light casement, swings out, aluminum, architrave trim.
- Second and a Half Floor - Two double hung, 4/4 light, two wooden sash, large wooden lintel and mullion, continuous wooden slipsill with tin sheathing, shutter hinges.

Southern Facade -

- Basement - Two double hung, 6/6 light, two wooden sash, recessed architrave trim panel shutters, stone slipsills, located in well, decorative wrought iron railing around well. One run stone stairway with winder leads to entrance under porch of #15. Entrance is recessed, four architrave trim recessed panels, three lights, vertical boards, recessed panels on jambs.

- First Floor - Two double hung, 6/9 light windows, two wooden sash, cornices with dentils and tin flashing, decorative wrought iron balcony, interior wooden shutters are louvered and have recessed architrave trim panels.
- Second Floor - Three double hung, 6/6 light, two wooden sash, movable louvered shutters, cornices with dentils and tin flashing, wooden lugsills.
- Second and a Half Floor - Three eyebrow casement, recessed, one light each side, swings in, movable louvered shutters, wooden lugsills.

#17 PROSPECT SQUARE

Northern Facade -

(Addition)

- Subbasement - One, seven vertical boards, recessed in well.
- Basement - One double hung, 6/6 light, two wooden sash, architrave trim, wooden slipsill. One hopper, four lights, wooden slipsill, swings in. On umbrage porch with slat board floor, modern iron railing, wooden steps, are three entrances, two are recessed with two architrave trim recessed panels, vertical boards, one light. One with five architrave trim recessed panels, vertical boards, cornice.
- First Floor - Two large double hung, 16/1 light, two wooden sash, continuous wooden slipsill, mullion, plain architrave trim. One casement, two sides of eight lights each, swings in, wooden slipsill, mullion plain architrave trim. One four light hopper, swings in, recessed, wooden slipsill, plain architrave trim.
- Second Floor - One casement, four lights, swings in, architrave trim, wooden slipsill. One casement, two sides of eight lights each, swings in, wooden slipsill, architrave trim.

Western Facade -

- Basement - Two double hung, 4/4 light, two wooden sash, wooden slipsills, flat brick arches, shutter hinges.
- Second Floor - One casement, replaced, four lights on each side, swings in, wooden slipsill, shutter hinges.
- Second and a Half Floor - Two double hung, 4/4 light, two wooden sash, large wooden lintel and mullion, continuous wooden slipsill, shutter hinges.

Southern Facade -

- Subbasement - Three iron grates in well of basement cover window wells of subbasement, unobservable.
- Basement - Two double hung, 6/6 light, two wooden sash, stone lugsills, shutter hinges, One double hung, 6/6 light, wooden slats panel below wooden slipsill, originally a door. All in well with decorative wrought iron railing.

First Floor - Two double hung, 6/9 light, two wooden sash, cornices with dentils and tin flashing, decorative wrought iron balcony, interior wooden shutters are louvered and have recessed architrave trim panels.

Second Floor - Three double hung, 6/6 light, two wooden sash, wooden lugsills, cornices with dentils and flashing.

Second and a Half Floor- Three eyebrow casement, one light each side, swings in, recessed, wooden lugsills.

INTERIOR DESCRIPTION #15 PROSPECT SQUARE

Owner states that floor plan of #17 is basically the same as that of #15, information from conversation 12/27/77.

Entrance leads to a side hall, with mahogany chair rail, on the western side of the house. On the right is a double parlor. Entrances to the parlors have shouldered architrave trim with cornices and bed mouldings. Entrance and window trims within the parlors (entrances between the parlors and between the northernmost parlor and the colonial kitchen on addition) are capped fluted pilasters, cornices, frieze with dentils and bed mouldings, and soffits. Ceilings on the first floor are eleven feet and eight inches high. There is an eight inch moulded baseboard on the first floor.

Two brown marble fireplaces in the parlors are parallel to the eastern wall on chimney breasts. These identical fireplaces have recessed spandrels and chamfered pilasters with brackets that support a black slate mantel. A tile hearth is in the floor in front of these fireplaces.

A stairway is parallel to and against the western wall and faces the entrance. This open string stairway features a mahogany newell and handrail, plain round balusters, and ornamental brackets. The open well staircase has one whole flight, three half flights (four runs) and three landings.

Door and window trim on the second floor is shouldered recessed architrave trim with cornices and bed mouldings. There is one wooden fireplace on the second and one half floor parallel to the eastern wall on a chimney breast.

The large variety and number of wooden mouldings and trims could be attributed to the fact that the original owner owned a lumber mill. (See Significance).

ENTRANCES

Two identical entrances on southern facade, on cement platform porches and steps, with wrought iron railing. (Doors are different). Each has triangular pediment with box cornice, soffit, dentils, and bed moulding, supported by two wooden fluted pilasters with scrolled console brackets with acanthus leaves. Transoms are one light, #15 has plain glass, #17 has beveled glass. Double doors on #17 are vertical boards with one recessed architrave trim panel below louvered panels. Double doors on #15 are vertical boards with two recessed architrave trim panels each. Two ornate wooden frontispiece entrances in vestibules identical except doors. Each has five light transom, one light on either side of three above door. Five light sidelights with shelf below, below shelves are recessed architrave trim panels, one on each side. Two acanthus leaf scrolled console brackets, on fluted pilasters, support an overhanging three part entablature including cornice, bed moulding, layered frieze, and soffit. The entablature on either side of overhang is the same but has no soffit. On lintel and above transoms are rectangular recesses. At the intersection of pilasters and lintel are quatrefoil flowers. Around the doors, the transoms and sidelights is cyma reversa moulding.

The inside door on #15 is custom made of cherry wood with dowels of different type of wood, vertical boards, six recessed panels (information from owner in conversation 12/27/77).

The inside door on #17 has one large light with architrave trim around it, vertical boards.

ADDITIONAL NOTES:

Outer walls of southern facade 2½ floors were originally painted to improve visual effect, white paint on #15 partially removed, #17 is painted a red color. From conversation with owner 12/27/77. Flat basket weave pattern brick patio behind #17. Modern brick walls enclose both back yards.

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

15 and 17 Prospect Square are identical (and connected) brick Greek Revival townhouses, set side to side, each mirroring the other. Using the usual Greek Revival domestic layout of three bays with doorways to one side (see 110 or 112 Washington Street), these houses have proportioned windows, those on the first floor are 6/9 and are almost floor to ceiling in height (and have inside shutters), second floor windows are 6/6 (#15 has shutters), while the third storey has shuttered 'eye-brow' windows. These last are just below the dentil cornice and are a part of a wide entablature formed by rows of bricks stepped out like belt courses. The first and second storey windows have tiny dentil cornices across their flat lintels. The side by side doorways have pediments supported by feathered scroll brackets and there are simple pilasters flanking the doorways. These doorways are merely the entry to an interior vestibule (see 110 Washington Street), the inner doorways have sidelights, transoms, and full entablature with brackets similar to those on the outer doorways. There are decorative iron railings across the first floor windows; there is a basement level below. Houses are rather deep and there are double end chimneys at either end.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)

15-17 Prospect Square defines the north end of Prospect Square, a predominantly Greek Revival complex around the Allegany County Courthouse and they are very fine examples of transitional Federal-Greek Revival urban architecture. They have not been fussed with or altered in any major way and they are equal to some of the better houses of this period in Georgetown (D.C.). They are similar to the double house 27-29 Prospect Square and they serve an important function in the townscape of this, the most attractive part of Cumberland.
